

ESI Midi Sync Converter

With the ESI™ syncbox you can convert midi standard timing signals to roland™ sync24. Now you can sync your Roland™ MC202, TB303, TR606 and TR808 with your midi setup. You can sync with your computer program for studio use or with a midi drumcomputer (e.q. a TR505) for live performance.

The syncbox needs no power supply, it uses the midi signal from the master unit for power. The syncbox has two sync outputs. So you can sync two units at the same time. (e.g. a tb303 and a tr808 or two 303's)

The syncbox comes with a one-year warranty on manufacturing faults. The syncbox will be shipped without midi cables.

Specifications:

Power consumption:	Less than 1 mA @ 5Vdc
Input signal:	Midi standard
Output:	2x Sync 24
Dimensions:	85mm x 57mm x 36mm (wxhxd)
Weight:	0.075 Kg

Distribution:

ESI Europe
phone: +31 (0)23-5581212
Fax: +31 (0)23-5581614
